

Carlos Andres Posada Chica

Site Reliability Engineer | DevOps & Cloud Engineer | AWS & GCP Certified
Carepa, Colombia • +57 324 312 9083 • carlosposada.dev@gmail.com • [linkedin](#) • carlosposada.dev

PROFESSIONAL SUMMARY

Site Reliability, DevOps, and Cloud Engineer with experience designing and implementing enterprise-grade architectures on AWS and Google Cloud. Certified as AWS Solutions Architect Associate, AWS AI Practitioner, Google Professional Cloud Architect, and Claude Certified Architect – Foundations. Specialized in Infrastructure as Code (Terraform), CI/CD pipelines, containers (Docker, EKS/ECS), and serverless services (Lambda, SQS, SNS), with growing hands-on experience in production support, incident troubleshooting, and Kubernetes-native provisioning with Crossplane. Proven track record leading high-impact architectural decisions, including platform restructuring for HIPAA compliance, evaluation and selection of hybrid on-premises/cloud architectures, and serverless solutions tailored to workload and budget constraints. Background in Telecommunications Engineering with strong expertise in networking, security (Zero Trust, IAM, VPC), and cloud cost optimization.

PROFESSIONAL EXPERIENCE

Site Reliability Engineer | EPAM Neoris

Remote • Jun 2026 – Present

- Support cloud infrastructure operations with a strong focus on Infrastructure as Code (IaC), building and maintaining automated, version-controlled, and reproducible deployments.
- Provide operational support and troubleshooting for production incidents, diagnosing and resolving issues affecting infrastructure availability and service reliability.
- Upskilling in Crossplane to support an upcoming initiative to adopt Kubernetes-native infrastructure provisioning within the team.

DevOps & Cloud Engineer | TechGenies

Texas, EE. UU. (Remoto) • Jul 2024 – Jul 2026

- Led cloud architecture decisions for multiple clients, selecting between hybrid on-premise, fully cloud-native, and serverless architectures based on workload, scalability, and budget constraints.
- Restructured platforms to achieve HIPAA compliance by redesigning access controls (IAM, Zero Trust), encryption (in transit and at rest), and event auditing using CloudWatch and X-Ray.
- Designed and implemented multi-environment AWS architectures with secure connectivity using VPC Peering, Security Groups, and least-privilege IAM policies.
- Led migration of legacy systems to AWS, including EC2 provisioning, secure networking (VPC), RDS (PostgreSQL) database migration, and container deployment using ECS/ECR.
- Managed Kubernetes clusters (EKS) to improve microservices scalability and resilience, with centralized monitoring using Prometheus and Grafana.
- Automated infrastructure using Terraform, ensuring reproducible, version-controlled, and auditable environments (IaC).
- Implemented CI/CD pipelines using GitHub Actions, Jenkins, and Codemagic for web and mobile applications (iOS/Android), reducing deployment time and errors.
- Designed cost-efficient Disaster Recovery strategies with defined RTO/RPO and multi-region backup approaches.
- Managed DNS with Route 53, SSL/TLS certificate renewals, Nginx/Apache hardening, and periodic vulnerability assessments.

Data & Infrastructure Automation | OneContact – Grupo Migesa

Medellín, Colombia • Mar 2024 – Aug 2024

- Designed and executed ETL pipelines using Python (Pandas) and SQL, ensuring data integrity for large-scale datasets with DevOps-inspired practices (versioning, monitoring, resilience).
- Automated data validation and cleaning processes, reducing processing time by 30% and integrating SQL databases with enterprise CRM systems.

Backend & DevOps Engineer | KutAI

Medellín, Colombia • Jun 2023 – Mar 2024

- Designed and implemented CI/CD pipelines using Docker and Argo CD, integrating serverless services (Lambda, SQS) for asynchronous event processing and reduced microservice coupling.
- Developed backend microservices using Express.js and Python (FastAPI), improving automated integration test coverage for QA teams.
- Implemented observability and early failure detection strategies, reducing production errors by 20%.
- Automated API testing using Postman and Python scripts to validate performance and service contracts before each release.

DevOps & Automation Engineer | Freelance

Remoto • Jan 2022 – Mar 2023

- Built and integrated automated test suites with Selenium and Puppeteer into CI/CD workflows, improving defect detection efficiency by 35% and shortening deployment cycles.
- Implemented automated API validation using Postman for multiple clients, ensuring service contracts and correct integration between components before each release.
- Established standardized and reproducible test environments, introducing DevOps practices (versioning, automation, basic monitoring) in teams with low continuous delivery maturity.

EDUCATION

BSc in Telecommunications Engineering — *In progress, Universidad de Antioquia • Medellín, Colombia*

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, ECS, EKS, RDS, S3, IAM, VPC, Route 53, CloudWatch, Lambda, SQS, SNS, Step Functions), Google Cloud (Compute Engine, IAM, Cloud Storage)

IaC & Automation: Terraform, Ansible, Docker, Kubernetes, CloudFormation (basic), Argo CD, Crossplane (in progress)

CI/CD: GitHub Actions, Jenkins, Codemagic, Argo CD

Serverless: AWS Lambda, SQS, SNS, Step Functions, event-driven architectures

Security & Networking: Zero Trust, VPC Peering, Security Groups, SSL/TLS, IAM (least privilege), HIPAA, networking concepts

Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch, X-Ray

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB (basic)

Languages & Frameworks: Python, JavaScript (Node.js), SQL, FastAPI, Express.js

QA & Testing: Cypress, Playwright, Postman, Puppeteer, Selenium, JIRA, Confluence

Languages: Spanish (Native), English (B1)
